BEST METHODS OF CARING FOR THE GARBAGE

MEDICAL JOURNAL GIVES TWO PLANS WHICH ARE SAID TO BE THE MOST APPROVED

BURNING AND REDUCING

Milwaukee Has An Incinerator And Columbus, O., Has a Reduction Plant, Each In Operation Over a Year.

Until lately American practice in the matter of garbage disposal has not been a matter for national pride. Two methods have been common: unsightly, malodorous piles of decomposing refuse have been—in some places still are!—allowed to accumulate in the vicinity of dwellings, or cheap, ineffectual "disposal plants" installed and operated by greedy or dishonest private contractors have been run for a few years and then allowed to lapse into well-earned oblivion. Neither procedure is creditable to a civilized state. There is really no need for a continuance of the offensive and wasteful methods that have been commonly employed in this country, says The Journal of the American Medical Association.

At least two methods of garbage disposal have proved effective in typical American cities: incineration and reduction. In the incineration type all kinds of refuse, ashes, paper, rags, scraps of food, kitchen waste, etc., are fed together into crematoriums and burned. In European works of this type the heat generated by the combustion with a forced draft is a source of considerable revenue. One of the best examples of an incinerator plant in this country is the Milwaukee incinerator, which has been in full operation since May, 1910. At the old Milwaukee plant the cost of disposal reached as high as \$1.37 per ton of garbage, while the cost at the new plant is less than 60 cents per ton. If the excess supply of steam generated at the plant is economically utilized the actual cost will be further greatly reduced.

In garbage reduction works, the sorted refuse is passed through various digestors, tanks and rollers with a view to extracting the valuable portions, especially the fats and the nitrogenous matters. The Columbus (Ohio) plant, put in operation in July, 1910, is the first reduction plant in this country designed and constructed by a municipality. Successful financial operation of this plant appears in the fact that it netted \$2,000 a month for the first six months.

The reasonable and business-like way of approaching the garbage disposal question is the employment of a reputable and competent engineer to examine local conditions and report on such topics as the most economical rates for collection and transportation, the establishment and location of one or more centers for disposal and the final method of

treatment—incineration or reduction—best suited to the amount and nature of the refuse gathered. Small towns should beware of the man who claims the expert adviser is better than the quack.

Endeavor Social.

The regular monthly meeting of the Presbyterian Endeavor society was held Friday night at the home of Miss Emma Sanner on south Minor street. There was a large attendance of the young people. After the dispatch of some important business, the rest of the time was spent in having a delightful time socially. After some humorous contests, in which the young ladies excelled, refreshments were served, and a gay company left with pleasant recollections of the occasion. It is hoped that a union of all the societies of young people in the churches will soon be accomplished as the result of this meeting. An effort in this direction will be made.

Never Out of Work.

The busiest little things ever made are Dr. King's New Life Pills. Every pill is a sugar-coated globe of health, that changes weakness into strength, languor into energy, brain-far into mental power; curing Constipation, Headache, Chills, Dyspepsia, Malaria. Only 25c at Fred Wenzler's.

Uncle Sam's Successful Restaurant.

If you visit the Isthmus you will eat at a Government table.

Not content with managing the transportation, not satisfied with being a landlord, the Isthmian Canal Commission has become a restaurant keeper, waiter and cook.

Here is a statement of the length to which this heretofore tendency has been carried.

The cost of running the messes for "gold," European and negro employees during the six months ending December 31, 1909, was over \$700,000, and the receipts and expenditures practically balanced.

It is an eloquent tribute to the Government's cuisine that 3,375 of the 4,800 European laborers—who are free to eat where they will—prefer the mess-halls to anything which "individual initiative" has to offer. There are three "club" messes run by unmarried white men in opposition to the commission hotels. Perhaps a hundred canal employees use them. But in spite of the larger income from the "bar" these private messes are more expensive and very little better than the Government's meals.

No private contractor in the world feeds his employees as well as the Isthmian Canal Commission. There are very few of the employees who, as in other places, sleep in clean, more comfortable beds, or amuse themselves in more wholesome clubs than those furnished by the Government—Albert Edwards in "Success Magazine."

You are not experimenting on yourself when you take Chamberlain's Cough Remedy for a cold as that preparation has won its great reputation and extensive sale by its remarkable cures of colds, and can always be depended upon. It is equally valuable for adults and children and may be given to young children with implicit confidence as it contains no harmful drug. Sold by All Dealers.

As We Speak It.

A German, who had come to America to master our language, was being shown behind the scenes of a vaudeville theatre by one of his American friends.

"That man," said the American, "indicates an actor with a wave of his hand. He is taking off his make-up to make up for another take-off."

The German departed, scattering. From "Success Magazine."

FIVE HUNDRED WILL ATTEND DEDICATION

MEMBERS OF SOUTH BEND AND MISHAWAKA CATHOLIC CHURCHES COMING TO PLYMOUTH SUNDAY.

WILL BE GREAT DAY

Impressive Ceremonies To Be In Charge of Right Rev. Bishop Aldering of Ft. Wayne.

Five hundred members of the Catholic churches of South Bend and Mishawaka will attend the ceremonies attendant to the dedication of the new St. Michael's church at Plymouth on Sunday, October 8.

A special train will leave Mishawaka at 8:45 a. m., over the Lake Shore, and will leave this city at 9 o'clock. Arrival at Plymouth will be at 10 o'clock. The trip will be made by way of Walkerton, where the train will transfer to the L. E. and W. tracks, proceeding to Plymouth.

Returning, the special will leave for South Bend at 6 p. m. Plans for the trip have just been completed by a committee recently appointed from South Bend council, No. 553, Knights of Columbus. A special rate has been offered by the Lake Shore and every Catholic society of South Bend and Mishawaka has been asked to participate.

The special train will be made up under the auspices of the Mishawaka and South Bend Catholic Foresters and Knights of Columbus. Of the latter order, members from North Wayne council, Mishawaka and South Bend have signified their intention of attending.

The St. Michael church has just been completed at a cost of approximately \$40,000. The cornerstone of the edifice was laid last fall, under the auspices of the South Bend council, Knights of Columbus. The structure is located on north Center street, directly across from the old church. The building is of pressed brick, with stone trimmings, and is the finest church structure in the city.

The dedicatory ceremonies will be conducted by Right Rev. Herman J. Aldering, bishop of the Fort Wayne diocese, and will consist of rites, most impressive in the Catholic church.

Another special train will be run from Laporte on the day of the dedication, and will bear delegations from this city, Michigan City, Walkerton and other towns along the route. The Laporte train committee is planning on an attendance of about 400 for its special invitations have been extended broadcast to Catholic societies of every city and town within a radius of nearly 50 miles from Plymouth.—S. B. News.

The best Plaster. A piece of flannel dampened with Chamberlain's Liniment and bound on over the affected parts is superior to a plaster and costs only one tenth as much. For sale by All Dealers.

Are Repairing Cupola.

The cupola on the Webster school building which was struck by lightning a short time ago, and badly damaged is being repaired. The work is being done by Harry Armstrong, and will be pushed as rapidly as the weather will permit.

Biliousness is due to a disordered condition of the stomach. Chamberlain's Tablets are essentially a stomach medicine, intended especially to act on that organ; to cleanse it, strengthen it, tone and invigorate it, to regulate the liver and to banish biliousness positively and effectually. For sale by All Dealers.

Sustains Painful Injury.

Ed Hollinshead, a mechanic employed in the garage sustained a painful injury Friday while repairing an automobile. One of the large blood vessels on his left forearm was severed, and Dr. Stephens was called to attend the injured member. While nothing serious will come to the accident Mr. Hollinshead is now being incapacitated.

Doan's Regulets cure constipation, tone the stomach, stimulate the liver, promote digestion and appetite and easy passages of the bowels. Ask your druggist for them. 25 cents a box.

The High Cost of Souls.

Rev. "Billy" Sunday, the famous ball player who has conducted evangelistic meetings in almost every part of the country, has succeeded, he thinks, in reducing the saving of souls to a businesslike basis. He has gone so far as to make an estimate of the cost of soul-living in various cities. In Mr. Sunday's cost sheet, Indianapolis souls come highest at \$620 each.

New York City souls are quoted at \$545, while in Boston they can be obtained for \$450. Other quotations are Denver \$425, Chicago \$395 and New Orleans \$78.

So far as Mr. Sunday has made investigations, souls came cheapest in Atlanta, where they may be saved for \$75 a head—if souls have heads.

"Billy" Sunday's figures have aroused much mystification and considerable adverse criticism. Atlantans complain because souls are so cheap and Indianapolis people because they are so dear. The general impression seems to be that "Billy" Sunday acquired the percentage habit in his base ball days and hasn't been able to shake it off.—From Success Magazine.

Children Cry FOR FLETCHER'S CASTORIA

Marriage at Fifty.

An interesting and unusual estimate of the proper age for matrimony is that advanced by Mrs. Vivian, head and founder of the National Society of the Daughters of California. The happiest and most successful marriages, she says, are those between the man of fifty and the woman of thirty-five. At that age of discretion, she claims, the male has become more mellow and tolerant as well as more solvent. On the other hand she intimates that a girl of twenty is much harder to get along with than to get along without, and that there ought to be laws prohibiting people marrying before they are thirty years old.

We do not know what authority the Daughters of California have in such matters, but we fancy that improvident young people will for the present continue to rush headlong into matrimony at assorted "under a es." When Mrs. Vivian's theory gets into working order the bachelor entering the bald, corpulent age of fifty may as well leave hope behind. If Dr. Osler doesn't get him the Daughters of California will.—From "Success Magazine."

Lame back is one of the most common forms of muscular rheumatism. A few applications of Chamberlain's Liniment will give relief. For sale by All Dealers.

Attempt at Burglary

Friday morning at about 12:30 someone attempted to enter the telephone office through the west window. Mrs. Glass, the operator and her grandmother were there alone at the time, and when in response to their question of "who's there?" they received no reply. Mrs. Glass called the Pennsylvania Luncheon Room for assistance. The proprietor, Mr. Stephenson, was there alone at the time, but promised to send someone if possible. He finally found a man who with the night watch hurried to the scene, but when they arrived the intruder had disappeared.

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

SATURDAY CLUB MEETING.

Members Study Life of Noted Writer and Critic Wm. Dean Howells.

The Saturday club meeting was held at the home of Mrs. Floy Bunnell on north Michigan street. The attendance was not as large as usual on account of the exodus of members to Chicago. A pleasant time was had, however, by those in the study of the noted writer and critic, Wm. Dean Howells. Papers on his life and writings were read by Mrs. Bunnell and Mrs. Armstrong.

Mr. Howells is probably better known as a critic of good writing than as a writer himself, though he has some good productions. He wrote a life of Lincoln, a poem on Two Friends, and his book, "The Rise of Silas Lapham," is well known. He also wrote some dialogues.

Are Building Wagon Shed.

Linkenbelt and Co., who have been increasing rapidly in business importance lately purchased a fine new wagon of Ringgenberg and Cullison. They are now engaged in building a shed for its accommodation to the east of their store room.

Torturing eczema spreads its burning area every day. Doan's Ointment quickly stops its spreading, instantly relieves the itching, cures it permanently. At any drug store, 35

BAD EFFECTS OF BEING IN CLOSE ROOMS

EXPERIMENTS SHOW THAT WE HAVE NOT CORRECTLY ANALYZED THE REASONS FOR RESULTS.

HEAT DOES NOT ESCAPE

Journal of American Medical Association Tells of Interesting Conditions—Effects Right But Theory Wrong.

It has long been believed that ventilation is necessary in order to remove poisonous emanations arising from the human body. But observations made to determine the nature of the poisonous properties of the expired air lead to negative results. No poison can be demonstrated in the air of crowded rooms, and the carbon dioxide is so relatively slight in amount that it cannot be held responsible for the physiological effects observed. To what, then, are due the disagreeable consequences of remaining in an overcrowded, poorly ventilated room, asks The Journal of the American Medical Association. Such consequences are real and not imaginary, and they range all the way from slight depression and headache to severe nausea, vomiting and collapse.

Physiological experiments show that these effects are due to interference with the normal loss of body heat caused by high temperature, increased moisture and lack of air movement. Healthy persons have been kept for several hours in a close cabinet until the carbon dioxide rose to 100 or 150 parts per 10,000—more than ten times the amount usually stated as "allowable"—but so long as the temperature and moisture were kept low no symptoms of illness or discomfort developed. The same result has been reached by simply having electric fans whirling in such an experimental cabinet. The motion these imparted to the air was sufficient to cause a normal physiological loss of heat from the body in spite of high temperature and humidity. Similar cabinet experiments in which the subject was enabled to breathe the fresh outside air through a tube, but was otherwise subjected to the conditions of a close room, showed that the symptoms attributed to "bad ventilation" are not due to poisons excreted in the breath. It is not the carbon dioxide in indoor air that is injurious, but the overheating, the stagnation and sometimes the amount of moisture.

This does not mean that there is no harm in crowded rooms or that the open air treatment of tuberculosis is based on false assumptions. The experiments merely substitute the right for the wrong interpretation of observed facts. Bacterial resistance may be lowered by a variety of factors. So far as tuberculosis is concerned, the predisposing effect of damp houses and damp climates is well known. The experiments suggest that there are as yet undeveloped possibilities in the control of indoor climate. Precise knowledge of the bad effects of overcrowding is the first step toward a scientific remedy for the condition.

There's nothing so good for a sore throat as Dr. Thomas' Electric Oil Cures it in a few hours. Relieves any pain in any part.

DUKE OF THE ABRUZZI.

These vessels were unaware that war had been declared and it is considered that the Italian attack was an act of piracy. The vessels were sunk at Preveza and the attack has incensed the Austrian government. In the event that Italy carries the war into Albanian territory Austria has decided to protest in a drastic manner.

In the meantime Prechia, Albania, is the scene of an uprising.

There is more Catarrh in this section of the country than all other diseases put together and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only Constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, O. Sold by Druggists, etc. Write Hall's Family Pills for constipation.

MEHMED V.
Sultan of Turkey, Who Has War with Italy on His Hands.

a Turkish destroyer in the harbor of Provesa, in the province of Epirus, and landed troops. The Turkish authorities are sending a battalion of troops to Provesa. This invasion of European Turkey is regarded as fraught with tremendous consequences, as it is far to the northeast of Tripoli, to which it was asserted the war would be confined. Epirus is an Albanian province, theater of many rebellions against the sultan. Italian munitions of war, it is discovered have been lately sent into Albania in quantities.

FIRST CAUSE OF TROUBLE

Treaty Closing Russo-Turkish War Gives Italy Tripoli Rights.

New York Sept. 30.—The trouble between Turkey and Italy dates back to 1878, when, with the making of the treaty concluding the Russo-Turkish war, the powers are understood to have agreed to permit Italy a "pacific penetration of Tripoli."

Turkey claims that this right has been respected ever since. Italy has colonized Tripoli until her interests there are very great. She has asserted, however, that her subjects have been mistreated by the Ottoman authorities and discriminated against. Frequent disputes have arisen, but the prolonged negotiations have never resulted satisfactorily to Italy.

Italians Leave Tripoli.

Tripoli, Sept. 30.—The demonstration of the Italian fleet off this port. It is now seen, is in the nature of a tentative blockade. The steamship Adria and Ercole have left here with the remainder of the Italian colony. Tripoli is now deserted save for Turkish soldiers and Arabs.

Germany to Be Neutral.

Berlin, Sept. 30.—It is learned from an official source that the attitude of Germany in the clash between Turkey and Italy will be strictly neutral. Germany will endeavor to get the other powers to join in an effort to localize the war and prevent trouble in the Balkans.

Troops Run Ashore.

Preveza, Sept. 30.—Italian gunboats encountered two Turkish transports with 2,000 troops aboard. The transports, determined not to be captured, steamed bravely on the rocks off Preveza and hundreds were drowned.

Warships Followed by Italians.

Constantinople, Sept. 30.—The latest reports to the admiralty were that the Ottoman fleet was making for the Dardanelles and that two Italian cruisers were following on the port quarter. The accuracy of the report is not vouched for.

Turkish Cabinet Resigned.

Constantinople Sept. 30.—The cabinet has resigned. Said Pasha, the president of the senate, has been appointed grand vizier. Kiamil Pasha has been appointed foreign minister while Shevket Pasha remains minister of war.

Hoist Italian Flag in Tripoli.

Constantinople, Sept. 30.—The Agency Ottoman, in a telegram from Tripoli, says Italian troops landed and hoisted the Italian flag on the government buildings.

Gives His Life for Mitten.

Kansas City, Mo., Sept. 30.—In an effort to save a lean stray kitten from a locomotive, I. J. Soper, a baggage man for the Kansas City Terminal company, dashed in front of a Santa Fe train. He was knocked twenty feet and killed. The kitten was crushed to death.

Retired Oil Merchant Dies.

Morristown, N. J., Sept. 30.—William Roscoe Lyon, a retired oil merchant of western Pennsylvania, was found dead in a chair in his home No. 210 South street. Heart disease was given as the cause of death.

Roosevelt's Nephew Nominated.

Little Falls, N. Y., Sept. 30.—Theodore Douglas Robinson, nephew of former President Roosevelt, won his fight for nomination for member of the assembly on the Republican ticket.

Pay Ross Claim.

The State Life Insurance Co. of Indianapolis, through its general agent, Mr. W. Chas. Compton, paid claim of Barney W. Ross Monday to his widow. The amount was \$10,000. Mr. Compton was in Plymouth looking after the matter.

Woman loves a clear, rosy complexion. Burdock Blood Bitters purifies the blood, clears the skin, restores ruddy, sound health.

BREMEN FAIR MEETS WITH BAD WEATHER

RACING IS VERY GOOD AND IS SEEN BY LARGE CROWDS ON THURSDAY.

ATTENDANCE WAS 2,500

Exhibits Fair But Lack In Both Amount and Quality—Attendance Good Considering Rain.

The Bremen fair this year has met bad weather, at least for the first three days. Today is better, though too late to do much toward the real success of the meet. Rain and disagreeable weather characterized Tuesday, Wednesday and Thursday.

However, in spite of this the attendance has been good. On Thursday the estimate was that about 2500 people were inside the grounds and were having a good time.

The fair this year seems not to be quite up to the usual high Bremen standard, except as to the races. These are said by those in attendance to have been specially good. The large crowd on Thursday watched the fast horses with much interest.

While some of the exhibits were quite good, most of them were not so fine as has been the case. The attractions on the grounds outside of the exhibits were also fewer than usual. Most if not all of this can be attributed to the bad weather.
